

HB401SM :: Supermoto Throttle Tube
Yamaha YZF450F / YZF250F (2006)**PARTS LIST**

- Throttle Tube 1

<<<<< IT IS RECOMMENDED THAT THIS PRODUCT BE INSTALLED BY A QUALIFIED TECHNICIAN >>>>>

- 1) Please be sure the motorcycle is cooled down and safe to work on.
- 2) Remove grip from OE throttle tube.
- 3) Remove throttle cable cap from throttle housing.
- 4) Remove the two cable cap screws and remove cover.
- 5) Disconnect throttle cable and remove OE throttle tube.
- 6) Apply moly-grease to throttle tube sliding surface. Slide throttle tube onto handlebar.
- 7) Apply grease to the throttle cable ends and tube guide cable winding portion. Attach throttle cable and throttle housing. Install rubber cable cap.
- 8) Torque throttle cable cap screws to 4 Nm / 2.9 ft lbs. After tightening screws check that the throttle tube moves smoothly. If it does not, retighten the screws for proper adjustment.
- 9) Install grip per manufacturer's instructions.
- 10) Periodically check both of the bolts.
