----- FEATURES -----

The Graves Motorsports Fender Eliminator Kits are designed to eliminate the stock rear fender to give the bike a sleeker look. While not used on our race bikes, our fender eliminator kits are designed and manufactured by the same staff that designs parts for our race bikes here in our Van Nuys, CA headquarters. This ensures a precise fit and finish.

All Graves Motorsports fender eliminator kits are fabricated from black anodized aluminum for long term reliability and great looks. There is no modification required to your stock fender and all necessary hardware is included for easy installation. This makes for a quick and easy install.

Graves Motorsports offers our fender eliminator kit with turn signal mounts (that fit the stock turn signals or our own aftermarket marker lights) or without turn signal mounts.

Founded in 1990 by Chuck Graves, Graves Motorsports is both a manufacturer of high performance exhaust systems and accessories as well as a professional road racing and supermoto racing team. Our racing expertise led us to win the AMA Superstock Championship in 2006 and 2004 as well as the AMA Supermoto Lites Championship in 2005.

Our ceaseless mission is to offer factory-quality, professional race-proven performance exhaust systems and accessories to privateer racers, track day enthusiasts and street riders alike. We race what we sell!
