Fender Eliminator 2011- 2014 Kawasaki ZX-10R

PARTS LIST

- Fender Eliminator Bracket 1
- Fender Tubes 2
- Turn Signal Mounting Plate 1
-

<<<<<< IT IS RECOMMENDED THAT THIS PRODUCT BE INSTALLED BY A QUALIFIED TECHNICIAN >>>>>>

- 1) Unplug the turn signals & license plate illuminator and remove the stock fender. Save the hardware from both ends of the fender tubes to be used with the Graves Fender Eliminator.

NOTE: If using a tail light with integrated turn signals disregard the following procedure.

- 2) Install turn signals on the lower turn signal plates, making sure the left turn signal is on the left side and the right is on the right side.
- 3) Replace the stock fender tubes with the short Graves Fender tubes using the stock hardware. Leave these loose for alignment.
- 4) Place the stock hardware bracket on top of the tubes. Align the license plate holder under the fender tubes as shown in the photo. If using an integrated taillight, at this point use the stock screws to fasten the license plate holder to the fender tubes. If using Graves turn signal mounts, align the turn signal mounting plate holes with the license mounting bracket holes and install the stock screws through the turn signal plate, license bracket, fender tubes and into the mounting hardware.
- 5) Align all pieces carefully and tighten all fasteners.
- 6) Run the turn signal wires through the center hole in the under tail bodywork and plug into wiring.
- 7) Fasten license plate with stock fasteners.

- 8) Test turn signals to be sure the left signal is on the left and the right signal is on the right.

The purchaser releases Graves Motorsports, Inc from all liabilities pertaining to the installation and use of purchased parts.
